These are valid questions, but I ask that you do not order or change anything just yet. I think the cart is a little before the horse as we still need to get Angie a final proposal which needs to be approved by Division. In the meantime, I can review the configuration with the development folks. The two items that are certain is that the tabulation laptops for the scanner must be on Windows 7 and the fully installed WinEDS laptops (server and workstation) for Clerk, Warehouse and Registrar must be on XP.

Thanks,
Mike

Hey confidentially something just occurred to me. If Democracy suites has to have Windows 7 and Wineds has to have Windows 2003 won't we need 2 different programming stations??
